OCCUPATIONAL HEALTH IS OUR SPECIALTY

Our mission is to provide occupational health services ensuring health and safety for all. Ex Legislative Decree 81/08 et seq. and technical and consulting services to support these services.

FOR ALMOST 30 YEARS, SAPRA HAS BEEN KNOWN FOR ITS RELIABILITY AND PROFESSIONALISM IN THE FIELD OF MEDICINE IN TUSCANY AND THROUGHOUT ITALY.

We have always guaranteed the best quality of service combined with the most affordable price. We are a Multipurpose Healthcare Company with a branched network of more than 150 Occupational Safety professionals and more than 180 partner healthcare facilities distributed throughout Italy.

SAPRA Group was founded in 1994 and includes clinical diagnostic and surgical healthcare facilities and commercial and consulting companies.

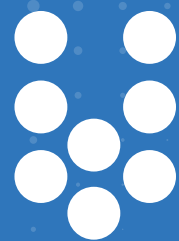

Thanks to a policy aimed at the implementation and diversification of our services, planned expansion of spaces and targets, and a national vision, today we can count on the cooperation of more than 450 surgeons,

more than 100 professional nurses and more than 100 administrative and technical employees.

National and international industrial groups have chosen us as their Health Services provider, counting on our professionalism, capillarity and reliability. Thanks to our network and a fleet of Mobile Ambulatory units, we are proud to be able to guarantee

complete territorial coverage, ideal for large, geographically spread businesses.

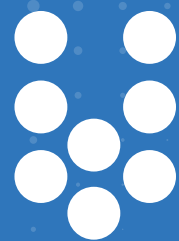

Our staff are always ready to guarantee excellent performance and advice, lending their expertise to support companies in managing their occupational health and safety.

HEALTH SURVEILLANCE

Comprehensive health
surveillance service Occupational
Medicine under Legislative
Decree 81/2008 et seq.

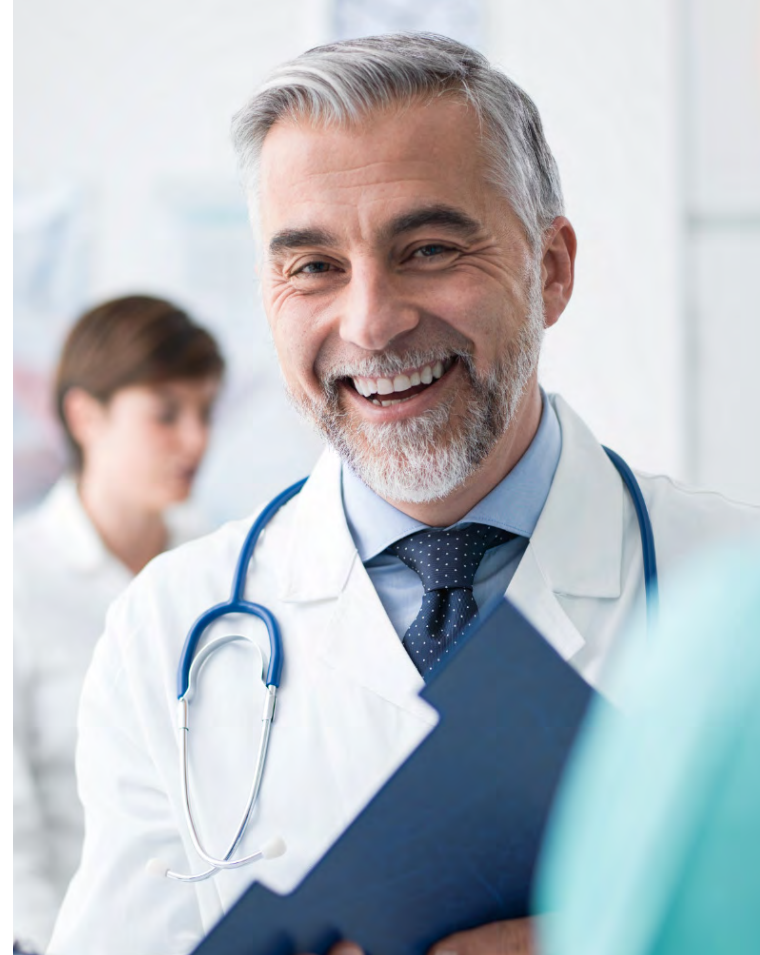

Your health and safety

We have been operating in health care management and organization for more than 25 years. We manage more than 50,000 workers undergoing health surveillance every year, with more than 150,000 clinical-diagnostic services in Occupational Medicine provided each year.

An Integrated Team

At the visit, our Competent Physicians may be accompanied by a health care provider, and if you do not have suitable premises, the team will perform the service within our Mobile Outpatient Units.

An interconnected network

Our customers include groups with thousands of employees undergoing health surveillance spread across all Italian provinces. SAPRA offers, through its medical, paramedical and technical staff, to conduct medical examinations, supplementary diagnostic examinations, meetings with company supervisors and technical inspections throughout Italy.

The Competent Doctors are present in all regions and coordinated by our Health and Administrative Management, to lighten and speed up the organizational process and make the management and delivery of health surveillance protocols uniform.

If required, our Medical Officer staff will liaise with your Managers regarding the potential drafting or updating of the Risk Assessment Document and all the necessary consultation.

Thanks to a collaborative network with clinical-diagnostic facilities scattered throughout Italy, at SAPRA we guarantee the performance of every specialized assessment, for example:

- Preventive and periodic medical examinations
- Visual acuity visio-test screening
- Eye exams
- Spirometry
- Audiometry
- Toxicology measurement
- Cycloergometry
- Laboratory hematochemical analysis
- Diagnostic assessment to verify absence of alcohol intake and alcohol dependence
- Supplementary diagnostic tests, if any ultrasound, x-rays, magnetic resonances, electromyography, ecodoppler, otoscopy

OUR NETWORK

A network of healthcare facilities and Medical Officers in all regions.

We have a network of partner facilities distributed throughout the territory that allows us to be present in all regions and almost all Italian provinces. Thanks to partnerships with about 200 clinical diagnostic centers and collaboration with more than 120 compe-

tent physicians, we can offer a widespread medical-nursing service throughout Italy.

Level 1 examinations and screening services can also be performed in-house or at suitable premises set up by the client or within

our Mobile Units that allow us to reach any home or operating site. Second level clinical diagnostic services will be performed at partner health facilities located throughout the Territory.

We are committed to ensuring:

- Medical visits at the company, in a clinic facility or mobile unit
- Audiometric examinations
- Spirometric examinations
- Visiotest examinations
- Laboratory analyses
Including home collection
- Electrocardiograms
Including a report from a cardiologist
- Toxicological testing
- Alcohol testing
- Ultrasound examinations
- Colour doppler echocardiogram examinations
- Home eye examinations
- Radiographic examinations
- Specialist visits in the area of the main medical specialties

ADMINISTRATIVE SERVICES

Secretarial service,
consulting and planning.
To give you only the very best.

What we do

- Planning and organisation of visits
- Administrative support
- Administrative assistance

As a supplement to the health service, our secretarial work is here to ensure effective service that relieves you of bureaucratic and organizational tasks.

Together, step by step

As a supplement to the health service, our secretarial work is here to ensure effective service that relieves you of bureaucratic and organizational tasks.

Our staff will liaise with your contact persons to arrange visits, informing them of the time, day and place where they will be carried out, and will produce the necessary documentation for the performance of the health surveillance service. Health records may be kept in SAPRA's archives.

We're here for you

Medical materials will always be available to you upon written request, and we will send you the forms, as required by Italian and Regional laws.

Our doctors will always be available for advice regarding updates and improvements to the risk assessment document.

For several years now, we have had a dedicated office to assist employers in drafting risk assessment documents and solving problems related to legislative updates on occupational health and safety.

MOBILE AMBULATORY CARE UNIT

We arrange in-person visits to your company in an efficient and timely manner.

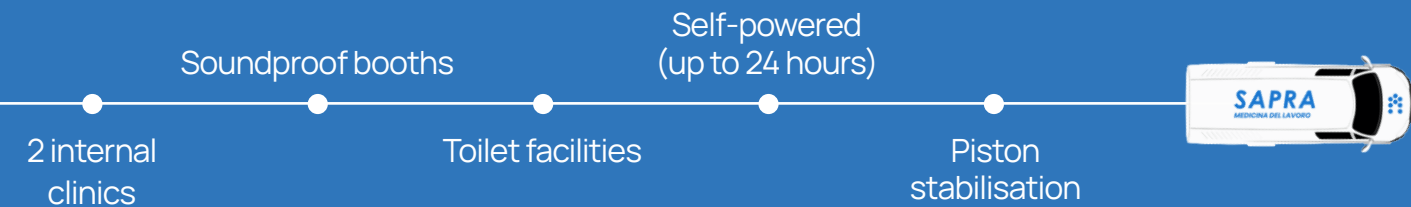

Each of our Mobile Clinics is equipped with 2 internal clinics, soundproof booths and toilets, in which to perform medical-diagnostic services in-person at the partner company, thereby optimising the organisation and execution of visits.

Our mobile units have a self-power system with a 24-hour runtime without external power and can be placed anywhere, even on the most difficult construction sites.

This solution is suitable for all companies that need an itinerant outdoor venue that enables timely and functional execution of health care services.

Main features

To offer a more efficient and timely service, SAPRA provides a fleet of Mobile Ambulatory units for Occupational Medicine (Mobile Clinics), equipped with:

Services available in mobile units

- ECG
- Blood samples
- Urine samples
- Toxicological examinations
- Audiometric exam in a soundproof booth
- Spirometry
- Visiotest examinations
- Ultrasound examinations
- Cycle ergometer (stress ECG)
- Colour doppler echocardiogram examinations
- Otoscopic tests
- Audiometric examinations (vestibular tests)
- Electromyography
- Eye exams
- Specialist visits in the area of the main medical specialties

TYPE A - The latest generation

Ideal for conducting cardiology, orthopedic, neurology, ENT, and vascular specialist examinations, this unit consists of two internal compartments that allow for the smooth performance of examinations and exams. One of the two internal rooms can be used as an office or waiting room, and thanks to the two auxiliary generators,

it has an autonomy of 48 hours. Benefits include indoor air conditioning and supplementary heating system for temperatures down to -25C° with the silent cab that can transform into a cabinet for urine specimen collection. The piston-driven stabilization system allows leveling even in the roughest terrain.

Equipment:

- Multipurpose bed
- Electrocardiograph
- Air conditioning system
- Spirometer
- PC for reporting purposes
- Test tube holder fridge
- Soundproof booth
- Additional folding bed
- Bath to collect urine samples

TYPE B - The queen of comfort

This mobile unit is best suited for examinations requiring basic diagnostics. Functional for taking blood-urinary samples and performing basic ECGs, it consists of two internal outpatient clinics with a silent cabin that can transform into a urinary sampling cabinet.

It is also equipped with an air conditioning system, ground heating, auxiliary generator with up to 24-hour autonomy and a piston stabilization system that allows leveling even in the roughest terrain.

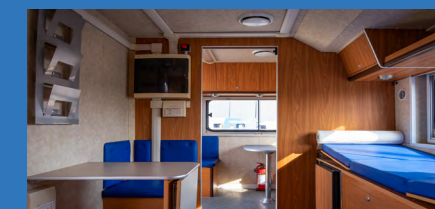

Equipment:

- Electrocardiograph
- Multipurpose bed
- Air conditioning system
- PC for reporting purposes
- Spirometer
- Visiotest examinations
- Audiometer
- Soundproof booth
- Bath to collect urine samples

TYPE C - The multi-purpose

Mobile unit equipped with 3 distinct environments suitable for the simultaneous activity of 3 healthcare professionals (1 doctor + 2 nurses) for carrying out medical examinations, supplementary instrumental tests, and blood draws. It is also equipped with a silent cabin located in a separate space that allows for audiometric

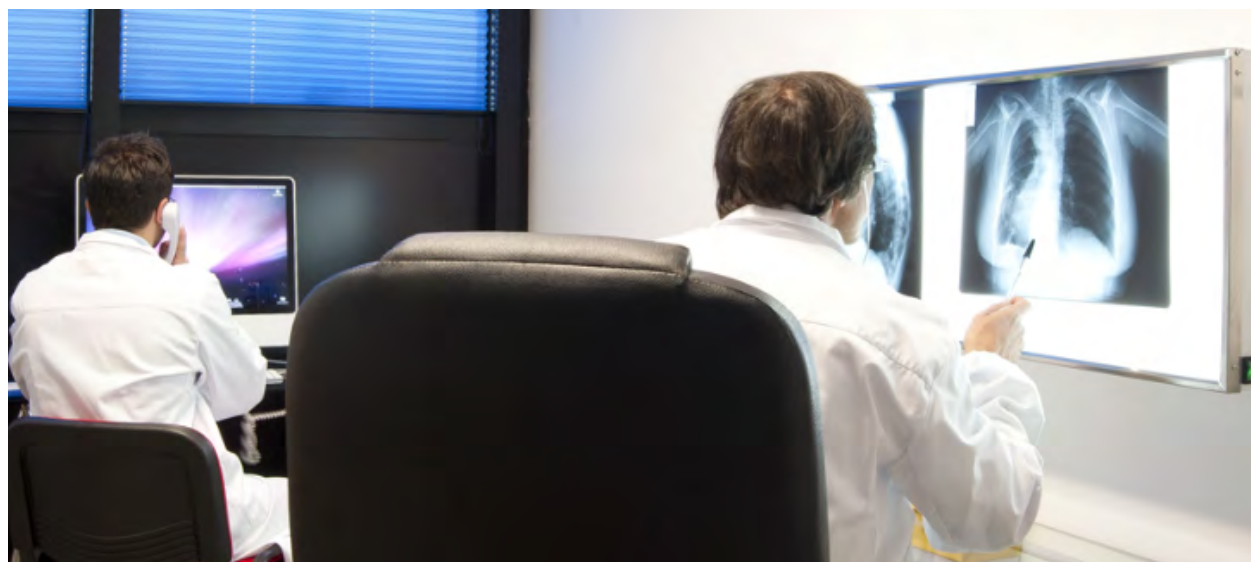

exams to be performed in an even more soundproof and high-performing environment. Additionally, this mobile unit is equipped with air conditioning, an auxiliary power generator with a autonomy of up to 24 hours, and a piston stabilization system that allows for leveling even on the most rugged terrain.

Equipment:

- Electrocardiograph
- Multipurpose bed
- Air conditioning system
- PC for reporting purposes
- Spirometer
- Visiotest examinations
- Audiometer
- Soundproof booth
- Test tube holder fridge

CLINICAL-DIAGNOSTIC SUPPLEMENTS

Clinical, nursing and diagnostic
supplementary services.
All in one place.

What we do

This service is designed for large companies that need a single provider for the supplementary assessments re-

quired by the Medical Officer for the issuance of the “judgment of fitness for duty”.

We know what you need

At SAPRA, the services we offer include technical and nursing support, for the performance of instrumental examinations for screening, home collection of biological specimens, and the performance and reporting of laboratory tests.

Thanks to our network of Specialist Doctors and Health Centers distributed throughout Italy, we guarantee to perform specialist examinations and diagnostic tests wherever you need them.

CORPORATE WELFARE

We take care of workers through inspections and prevention.

Our company welfare project offers a range of preventive services that can be carried out both at the company headquarters and in the health centres that are part of our national network.

This service is especially for those companies that want to combine corporate benefits with health and prevention policy for their employees.

Our check-ups are customizable in both range of services and price ranges and are delivered by our skilled physicians and nurses within our mobile outpatient units. More complex services, on the other hand, are performed at the medical facility closest to your location.

Our check-ups include

Each checkup can be customized by age group, gender, habits or work activity.

Our secretariat takes full responsibility for scheduling visits and contacting employees or company supervisors.

A report on the patient's health status is produced at the end of each checkup.

These preventive controls are an excellent solution to the disbursement of productivity bonuses and company benefits, as they are fully deductible for both the company and the employee.

REGULATORY AND LEGAL ADVICE

The Service

For many years we have had a department totally dedicated to consulting services for the interpretation and management of current regulations, and for the resolution of legal issues related to health surveillance activities.

Our Administrative and Legal staff is at the client's disposal for the management and resolution of all issues related to the various legal requirements associated with Occupational Medicine disciplines and the provision of health surveillance in companies:

- Updating of health protocols so that they are in line with new regional and national provisions
- Management of vulnerable workers
- Management of occupational diseases
- Management of workplace accidents
- Transmission of documents and health records to territorial inspection bodies
- Support for the management of health and safety measures to prevent infection and contagion in the workplace
- Any other practice related to the role of the Medical Officer

The management software for Occupational Medicine

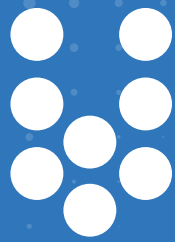

SiProm management software

SiProm Web is our software for smart management of Occupational Medicine-related activities in your company.

With SiProm, you can:

- Perform employee searches and extract the list in csv (Excel) format.
- Access each employee's file, which contains biographical and career details (matriculation, home office, supervisor, type of employment, date of hire) as well as specifics on the medical examination.
- Download employee ratings upon upload by the health surveillance facility.
- Download the inspection forms and appointments of the medical officers
- Track employee visit schedules by time frames and the last visits completed.
- Download the suitability form of the last visit as a PDF and the document on inspection, company visits and appointment of the medical officer.

CERTIFICATIONS. OUR QUALITY POLICY IS PROFESSIONAL, WIDESPREAD AND INTERNALISED.

SAPRA Safety srl is a company authorized under Tuscan Regional Law no. 51/2009, Articles 4 and 5, to carry out health related activities in the discipline of Occupational Medicine and safety in work environments. SAPRA Safety Ltd. is a company certified in accordance with UNI EN ISO 9001:2015 standards.

The Quality Management Manager of SAPRA seriously and transparently explains the Quality Policy and is committed to its internal distribution. The principles regulating it are reviewed annually in order to verify and possibly update its adequacy.

Our quality objectives arise from:

- A careful and objective analysis of the internal situation.
- The results achieved and future objectives.
- The external environment and the requests of customers and stakeholders.
- We aspire to achieve total customer satisfaction, prevention of occupational accidents and rational use of resources.

We strive to continuously improve our offerings by:

- Monitoring business processes.
- The management of risk and non-compliant situations.
- Prevention.
- Ensuring staff growth.
- Compliance with standards.
- Stable and continuous relationships with suppliers.
- Attention to safety in the workplace.
- Respect for the community and the environment.
- Data analysis.
- Economic performance.

We have achieved these objectives by developing a Quality Management System compliant with UNI EN ISO 9001:2015 standards.

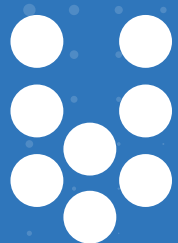

Our policy is to:

- Identify client needs and expectations.
- Provide top-quality service.
- Comply with safety laws and regulations.
- Offer a high level of professionalism.
- Provide qualified personnel and quality tools.
- Increase the level of staff training.
- Enforce collaboration with suppliers.
- Improve and prevent.
- Monitor the management system to ascertain its effectiveness.

We apply these practices to ensure seriousness, professionalism, effectiveness and efficiency to all our activities, with staff constantly involved in operating according to our Quality Management System.

SAPRA Safety srl has an insurance policy for RCT (third-party liabilities) and RCO (Employee liabilities and professional liabilities) in the health care practice.
